

Institut Marquès has bought Clane Fertility Clinic in Dublin

- *Institut Marquès increases the services of Assisted Reproduction in Ireland where it already had a consulting room.*
- *Internationalisation of Institut Marquès: getting closer to patients*

Barcelona, 17th of May, 2016

Institut Marquès has signed the purchase agreement with the renowned assisted Reproduction centre Clane Fertility Clinic based in Clane, 30 Km from Dublin. With this new clinic, Institut Marquès will shortly increase the services in Ireland and neighbouring countries, such as England, offering the same treatments as the clinic in Barcelona.

Clane Fertility Clinic will now be called Institut Marquès: a specialised medical team from IM Barcelona will be based now in Dublin joining the team of 23 professionals that was part of the previous clinic.

Tradition and Innovation

Institut Marquès (IM) was born in Barcelona, and it is a reference centre in Gynaecology and Assisted Reproduction with more than 90 years of experience. IM is a clinic of international renown with centres in five countries of Europe and in the United Arab Emirates. Led and managed by Dr Marisa López-Teijón, Dr Leonardo Marquès Amorós and Dr Esther Velilla, IM treats patients from over 50 countries –many of these patients had previous failed assisted reproduction treatments. IM is specialised in treating these complex cases gaining its international renown in the field of Gynaecology and Assisted Reproduction.

IM already has one centre in Dublin and one in London, both of them with a consulting room where IVF patients can start their treatment and then travel to Barcelona for the transfer of the embryo. With the new clinic in Clane we are offering all the treatments in our Irish clinic as opposed to traveling to the clinic in Barcelona.

Cutting-edge facilities

Up until now Clane Fertility Clinic was run as a unit of Clane General Hospital. It was established in 1986 but the clinic was opened in the current building in 2009. Its size is 700 sq.m. and it is located one kilometre from Clane General Hospital. After the purchase, IM will maintain the collaboration with the hospital. The clinic also has its own reproduction laboratory.

Institut Marquès has decided to invest in the Irish clinic with new technologies and improve some of the facilities. Shortly, the clinic in Clane will offer the same innovative services as IM Barcelona: the Preimplantation Genetic Diagnosis, the Embryomobile – which allows future parents to watch their embryos from their smart phone– or the new Erotic Personal System –for obtaining sperm samples. In order to increase the success rates, IM will also incorporate music in the process of Assisted Reproduction in the new clinic, as it is already done in Barcelona.

About Institut Marquès

Institut Marquès Barcelona: centre of international renown in Gynaecology, Obstetrics and Assisted Reproduction. As well as clinics in Barcelona, Milan and Dublin, IM has also centres in London and Kuwait.

The centre, with lots of experience in complex cases, helps people from over 50 countries make their dream of becoming parents a reality. IM has the highest pregnancy rates, 89% for IVF with Egg Donation

IM, innovation pioneer, has an important line of research in the effects of music at the start of life and foetal stimulation.
